

SpendWise

Smart, Simple & Offline-First Personal Finance

Master your daily spending with zero cloud friction, instant 1-tap presets, and real-life 25th-to-24th salary cycles.

100% Offline
Local SQLite database

25th - 24th Cycle
Matches real paydays

< 1s Entry
1-Tap Quick Presets

90 / 90 Tests
100% passing test suite

MARKET PAIN POINTS

Why Traditional Finance Apps Fail

Over 80% of users abandon expense tracking apps within their first week.

1. High Entry Friction

Logging a cup of coffee takes 4 to 5 screens, date pickers, notes, and confirmations.

When entry takes more than 3 seconds, users quit logging daily expenses.

2. The '1st of the Month' Fallacy

Traditional apps tie budgets to calendar months (1st to 30th).

In reality, professionals receive salaries on the 25th, making standard calendar reports useless for cash flow.

3. Cloud Bloat & Privacy Risks

Forced account registrations, third-party analytics, and bank syncing dependencies.

Apps often exceed 200MB, drain battery, and store personal financial records on external servers.

CORE PHILOSOPHY

Designed for Daily Speed & Simplicity

Every architectural choice was made to make tracking frictionless and transparent.

Realistic 25th-to-24th Cycles

Budgets automatically align with your actual salary cycle.
Smooth transition every 25th with rollover reminders, safe daily pace, and zero manual setup.

Zero Cloud, Instant SQLite

100% on-device SQLite database via Drift.
Instant queries, airplane-mode ready, zero telemetry, and complete ownership of your data.

Segregated Categories

No confusing merged categories.
Expense categories carry monthly budget limits, while Income categories track salary and secondary revenue.

Lightweight Craftsmanship

Optimized APK bundle size under 80MB.
Clean Material 3 with high-contrast Dark Mode tokens, smooth 60fps animations, and zero bloat.

FRICTIONLESS UX

1-Tap Direct Quick Presets

Log frequent daily transactions directly from the dashboard in less than one second.

Instant Ledger Insertion

Tapping a preset chip (e.g. 'Espresso • 45.00 EGP') immediately writes to SQLite without opening dialogs.

3-Second Auto-Dismissing Undo

A clean floating SnackBar confirms the entry with an Undo button. It automatically slides away after 3 seconds.

Dynamic Budget Monitoring

Even with 1-tap logging, budget limits are immediately calculated. Alerts trigger if approaching category thresholds.

DASHBOARD PRESETS EXPERIENCE

1-Tap Chips Available on Home Screen:

- ☕ Espresso • 45.00 EGP
- 🥗 Work Lunch • 120.00 EGP
- 🚕 Daily Commute • 35.00 EGP
- 🛒 Supermarket • 250.00 EGP

Immediate Confirmation Banner:

[✓ Added 'Espresso' (45.00 EGP) UNDO]

↳ Slides away automatically after 3.0s

DAILY FINANCIAL AWARENESS

Daily Spending Sum & Dynamic Safe Pace

Know what you spent today and what you can safely spend tomorrow.

TODAY'S SPENDING CARD (DASHBOARD)

355.00 EGP

2 expenses logged today • Within safe pace

Daily Safe Pace Badge: ~958.22 EGP / day
Formula: Remaining Cycle Budget ÷ Days Remaining

- If you spend less today, tomorrow's allowance grows.
- If you spend more, it gracefully adjusts downwards.

TRANSACTIONS CHRONOLOGICAL DAY HEADERS

[Today] — Spent: 355.00 EGP
- Grocery Supermarket ..... 310.00 EGP
- Morning Espresso ..... 45.00 EGP

[Yesterday] — Spent: 180.00 EGP
- Pharmacy Medicines ..... 180.00 EGP

[Wed, 14 Oct] — Spent: 95.00 EGP
- Commute Fuel ..... 95.00 EGP

REPORTING & ANALYTICS

Visual Reports & Cash Flow Trends

Comprehensive budget analysis without complicated accounting spreadsheets.

Category Spending

Ranked expense breakdown with percentage share progress bars.

Quickly identify where the largest share of your budget went during the current 25th-to-24th cycle.

Budget vs. Actual

Real-time limit tracking with visual progress indicators:

- Green: Safe spending
- Amber: Near 80% limit warning
- Red: Overspent category alert

MoM Cash Flow Bar Chart

Historical month-over-month bar chart comparing:

- Total Income vs. Total Expenses
- Net savings margin and rate
- Fully interactive across past salary cycles

PRIVACY & INTELLIGENCE

Bank-Grade Security & Smart PIN Lifecycle

Protecting your financial data with zero annoying interruptions.

SMART 4-DIGIT PIN LOCK

• Cryptographic SHA-256 Hashing:
Your PIN is salted and hashed locally. The raw PIN never touches disk, logs, or network.

• Smart Lifecycle Awareness:
Unlike basic PIN locks, SpendWise understands system states:
- Swiping status bar / Wi-Fi toggle (inactive): Session remains unlocked.
- Leaving app or locking screen (paused): Immediately locks the session.

RELIABLE NOTIFICATIONS & CSV EXPORT

• Daily Evening Reminder:
Scheduled local alarm (default 9:00 PM) prompting you to record expenses.
Uses flutter_timezone to detect exact IANA timezones (e.g. Africa/Cairo) and Android exact alarms.

• 1-Tap CSV Data Portability:
Export all transactions or current cycle summary directly to Excel or Google Sheets. 100% data ownership.

ENGINEERING EXCELLENCE

Modern Architecture & Automated Quality

Built on clean architecture with comprehensive automated test coverage.

TECHNICAL STACK

- Framework: Flutter 3.x / Dart 3.x
- State: Riverpod 2 (Notifier / Unidirectional flow)
- Database: Drift (Type-safe SQLite ORM)
- Math: Integer Minor Units (Zero floating-point errors)
- Notifications: flutter_local_notifications + flutter_timezone
- Theming: ThemeContextExt (High contrast Dark/Light tokens)
- APK Size: Strictly under 80MB

AUTOMATED TEST SUITE: 90 / 90 PASSING

- Money Value Object Tests:
  Exact addition, subtraction, division, and rounding.
- Budget Cycle Calculator Tests:
  25th-to-24th salary boundary transitions & leap years.
- Database Integrity Tests:
  Foreign keys, cascade renaming, and safe deletion.
- Security & Lifecycle Widget Tests:
  Validating PIN hashing, status bar swipe, and pause lock.

SUMMARY & NEXT STEPS

SpendWise: The Future of Personal Finance

Empowering users with effortless financial clarity every single day.

WHAT SETS SPENDWISE APART

- Built for real paydays: 25th-to-24th salary cycle.
- Sub-second entry: 1-Tap quick presets with Undo.
- Instant daily feedback: Today's spending & safe pace.
- 100% privacy: Zero tracking, local SQLite storage.
- Light & fast: Under 80MB, battery-efficient.

UPCOMING HORIZONS

- Interactive Category Donut Chart:
  Tap-to-highlight category shares in Reports.
- 1-Tap Duplicate Entry:
  Clone recurring transactions directly from ledger.
- Offline Backup & Restore:
  Export and import complete JSON backups for new phones.
- Subtle Haptic Feedback:
  Gentle tactile vibration on preset and PIN taps.
